VIENNA

DISPATCH NO. **NAVA-2042**

DATE: **27 October 1948**

TO : Chief, Foreign Branch M  
FROM : Chief of Station, Vienna **END**  
SUBJECT: General: Operational  
Specific: **Burial of Radio Sets**  
REF : **NAVA-1966 KAPOK**

Attention: ☐ ☐

DOCUMENT NO. \_\_\_\_\_  
NO CHANGE IN CLASS. ☒  
☐ DECLASSIFIED  
CLASS. CHANGED TO: **TS S 2011**  
NEXT REVIEW DATE: \_\_\_\_\_  
AUTH: **HR 72 JUN 1994** REVIEWER: ☐ ☐  
DATE: \_\_\_\_\_

1. This report contains the account of the burial of the remaining four radio sets and is supplementary to the reference memorandum.

2. The location of the last four SSTR 1's is as follows:

*Good  
Index*

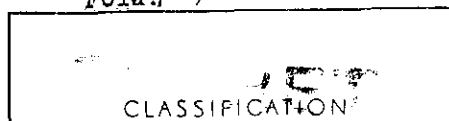

- a. Set # 7 - ☐ ☐ See VSM/MIL/697 and sketch (attached).
- b. Set # 8 - This set was buried by ☐ ☐ alone. It's location is known only to ☐ ☐ and ☐ ☐. See VSM/MIL/702 and sketch (attached).
- c. Sets #9 - These two sets, buried by ☐ ☐ and ☐ ☐, are known to no one else. Their location is described in the attached memorandum from ☐ ☐ to ☐ ☐. Photographs, negatives and sketches of the location are appended.

3. It will be noted that sets # 8 and # 10 are both buried on Himmelstrasse. ☐ ☐ buried # 8 the night before he left on his vacation, and we did not receive the description of the location until he returned. Meanwhile, ☐ ☐ has buried set # 10 on the same street. Checking on the burial places, ☐ ☐ reports that these two sets are separated by approximately half a mile, and that therefore, there is no particular reason to move either of them.

## MEMORANDUM

VIENNA

NO.: VM/KL/697

CLASSIFICATION

DATE: 21 October 1948

TO : ☐ ☐

FROM : ☐ ☐

SUBJECT : Location of ☐ ☐ Radio #2

REF :

1. Proceed from Dörfles (see U. S. Army map Wiener Neustadt, Austria, A.M.S. N 671 (G.S.G.S. 4416) 1944 Wiener Neustadt, Austria, N 4745-N 1520/30 x 60 (coordinates N 240-E 467) on road toward Netting (coordinates N 234-E 477) for approximately  $\frac{1}{2}$  kilometer until a road appears on the left branching off to Willendorf (coordinates N 220-E 455). At this point, a barn may be seen on the left of the road and a bit farther on one will see a small way-side chapel, or shrine, on the right side of the road.

2. On the Dörfles side of the shrine a path runs up to the right into the woods past a farmhouse (belonging to Farmer FINK) to Drachenstein ruins. Following path "A" up the hill, one passes the farmhouse on the left, and sees a string of telephone poles running parallel to path "A" on the left. The radio is buried on the slope side of the fifth (5) telephone pole from FINK's farmhouse,  $\frac{1}{2}$  meter from the pole.

3. This fifth pole is accessible from foot-path "B" that branches off at right angles to path "A", approximately 300 meters from the Dörfles-Netting road. A fourth telephone pole (from FINK's) is on the immediate right of foot-path "B" and bears the sign "Aufgang Verboten". At this point leave foot-path "B" and walk directly toward the fifth telephone pole.

4. See attached diagram.

1. Follow the Himmelstrasse out of town towards the Hohenstrasse, passing house #133. About  $\frac{1}{2}$  kilometer before reaching the Hohenstrasse, one will notice a lamp post on the right (#2769 is stencilled on it). This is one of the few lamps in working order in the immediate vicinity.

2. Sight along the pole at right angles to the Himmelstrasse across the valley to a large yellow house on the opposite side; follow the sight through the underbrush to the edge of the fields. Facing the yellow house on the edge of the fields right turn and proceed four (4) paces and one will notice a foot path running back to the Himmelstrasse. The radio is buried in the path three (3) paces from the edge of the field.

3. See attached chart.

1. SSTR 1 # 9 was buried in a wooded valley on the western end of Sieveringerstrasse, Vienna XIX. It can be located by proceeding out Sieveringerstrasse 1.2 miles (1.9 km) from the end of the Sieveringer trolley line, or .4 miles (.64 km) from the last building on the left hand side of Sieveringerstrasse, to the point where a brook crosses the road and joins the main stream running along the left hand side of the road. The small concrete bridge at this point is the first on the road and is unmistakable. Immediately beyond this bridge, and to the left, another concrete bridge crosses the stream giving access to two main footpaths running left and right parallel to the road on the opposite side of the stream. However, directly in front of the footbridge, at right angles to the road, and up a small incline, a third footpath enters the woods through a growth of young trees. This footpath is not as well defined as those running left and right but is marked on its right hand side by a young tree with a painted white-red-white band. Following this path through the group of small trees and underbrush, still at right angles to the road, for 45 paces from the edge of the road, or 23 paces from the top of the incline, brings one to a triangular group of three maple trees. These trees lie just to the right of the path, are approximately 20-25 years old and are further distinguished by the fact that, in the middle of the triangle formed by them, is a small stump which is beginning to sprout new branches. The set is buried approximately six inches deep midway between the stump and the tree nearest the road.

2. See attached chart and photographs.

3. SSTR 1 # 10 is located on the edge of a valley on the western end of Himmelstrasse, Vienna XIX. It can be located by proceeding out Himmelstrasse to the lamp post on the right hand side of the road which has a stencilled number 2761. As a double check, this is the third lamp post on the right hand side beyond the gate leading to Bellevue Hoehe, 113 Himmelstrasse. Approximately 20 feet (or 7 meters) further along the road is a wooden telephone or electric pole with a brace on its downhill side. Another eight feet beyond is an opening in the right hand roadbank from which the beginning of a row of bushes covering a drainage ditch can be seen. This bush row is quite easily distinguished by

the fact that it continues from the top to the bottom of the hill at right angles to the road. It is the only row of bushes observed anywhere in the vicinity running down the entire length of the hill. Following a faint path at right angles to the road for thirty paces to and through the first section of bushes brings one to a small clearing approximately three meters in diameter. This clearing is just to the left of the covered drainage ditch and can also be entered by an opening on the left side of the bush line. The spot can be definitely identified by a bottomless blue pail which was placed by the reporting officer completely over the branches of a thorny bush and which now rests on the ground with the bush growing through it. The set is buried approximately six inches below the surface in this small clearing  $1\frac{1}{2}$  meters uphill from the marked bush.
